<https://www.linkedin.com/in/anhdnt2505>

SUMMARY:

As a calm and adaptable person, I quickly adjust to new environments and do not shy away from challenges. I find excitement in identifying solutions to problems.

EDUCATION:

2013 - 2018 | Can Tho University

Bachelor of Computer Science

WORK EXPERIENCE:

Fujinet System JSC

Software Developer | January, 2018 - April, 2023

- Mobile app development: Mobile app development. Developing applications on Android, implementing the feature of notifying members when they reach a new level, displaying a popup notification after a successful cryptocurrency transaction.
- Web development: Developing new features, performing maintenance, and addressing issues that arise in the production environment.
- Data Warehousing: Setting up, designing schema, and managing BigQuery. Developed an internal application for data access with report visualization. Integrated Apache Airflow for daily ETL loading into BigQuery.
- Data visualizing: Generating visual representations (such as charts, graphs, and tables) from the extracted data. Providing solutions to reduce time and cost for each data query.

Freelance

Freelance Developer | April, 2023 - Present

- Designed and assisted in developing websites for a Milk Tea Shop.
- Helping with AI training activities like image classification, semantic segmentation, and object detection.
- Learning Generative AI
- Self-learning about Configuration Management and Cloud technologies.

SKILLS:

Java, Python, JS, Bash Script, Spring Boot, Struts, JUnit, Docker, Docker, Jenkin, GCP, MySQL, PostgreSQL, Oracle Database

CERTIFICATIONS:

Troubleshooting and Debugging Techniques

- Google
- Credential ID 8LFGRQJN38AG

Global Software Talent (C++)

- FPT SOFTWARE
- Credential ID FSOFST_GST_1580

RELEVANT PROJECTS:

E-commerce Bookstore System

Web Developer | April, 2022 - April, 2023

- Maintenance an E-commerce bookstore system for a Japan's Corporation.
- Managing and maintaining the administration interface of the bookstore system.

Bookstore Data Warehouse

Data Engineer | April, 2020 - April, 2022

- Building and developing big data storage and processing systems
- Requirement Analysis and Data Design Organization from Various Sources Integrated into a Data Warehouse

Crypto Wallet App

Mobile Developer | June, 2018 - August, 2018

- Building a cryptocurrency wallet linked to a previously created social networking application. For each transaction conducted through the wallet, users will receive a unique type of cryptocurrency generated specifically for that wallet.

Social Network App

Mobile Developer | January, 2018 - June, 2018

- Empowering Social Interactions with Crypto Tipping: This social network app fosters a unique and engaging community by integrating cryptocurrency tipping directly into the platform.
